NHS Grampian and NHS Highland both have an exciting and rare opportunity to join their friendly, dynamic teams. These new posts are available with immediate effect and are offered on a whole-time or part-time basis.

The Restorative Dentistry Department of NHS Grampian services the North East of Scotland covering a widely scattered population of over 630,000. NHS Highland’s Raigmore Campus site includes the Orthodontics and Maxillofacial Unit which services a geographically scattered population of 220,000.

The Centre for Health Sciences on the campus houses the Inverness Dental Centre which includes training facilities for undergraduates from the Universities of Dundee and the Highlands & Islands.

The successful applicants will preferably have a broad interest in Restorative Dentistry including the delivery of multi-disciplinary care and will join an existing Consultant team at Aberdeen Dental School and Hospital and Raigmore Hospital in Inverness, respectively. Dentistry in Grampian and the Highlands is experiencing significant changes with expansion in all the Dental Specialities. It is envisaged that collaborative working between both centres will take place in establishing a North of Scotland Clinical Network for Restorative Dentistry.

The Restorative Dentistry service provides specialist treatment across all branches of the discipline including an active dental implant service and provides diagnosis advice and treatment planning for dental practitioners. Applicants are required to be fully registered with the General Dental Council and also be on the General Dental Council’s Specialist Register for Restorative Dentistry. Applicants should hold MFDS/FDS RCS or equivalent.

For example, there are 17 return flights to London daily. Aberdeen, the “Oil Capital of Europe” is a cosmopolitan city with a variety of good bars and restaurants as well as several shopping centres. There are active theatre, concert hall and art gallery programmes.

Inverness is the Capital of the Highlands and the regional centre for the north of Scotland. It has all the amenities of a small city whilst offering easy access to spectacular countryside, including the Cairngorm National Park, with opportunities for a wide range of outdoor pursuits. Inverness is also well connected in terms of road, rail and air links with the rest of the UK.

Informal enquiries should be made to Mr M Donachie, Consultant in Restorative Dentistry and Clinical Director, NHS Grampian on (01224) 554915 or to Mrs C Lush, Clinical Dental Director, NHS Highland on 01463 704635.

To apply please visit www.medicaljobs.scot.nhs.uk and search for Ref No SS5631. Closing date 24th May 2013.
